Projects

jaygriff.com/projects

jaygriff.com — Personal Platform
- Full-stack content and development platform powering posts, docs, and webapps in one repo
- Built custom component system, dev tools, admin interface, and content pipeline for rapid iteration

Deep Dive — AI Security Auditor
- Streams an LLM-generated vulnerability report as it reads a public GitHub repo file by file
- Lets users choose exactly which files to scan, rather than auditing an entire repo indiscriminately

Food Math — AI Nutrition Logger
- Parses plain-language food descriptions into structured nutrition data using LLM structured outputs
- Human-in-the-loop approval flow keeps logging fast without sacrificing accuracy

Strava Analyzer — Fitness Data Analytics
- Connects to the Strava API, analyzes user activity and stream data, and presents visualizations
- Runs entirely client-side to protect privacy, and uses caching to reduce API calls

Locus — Chrome Extension
- Fast bookmark launcher with fuzzy search and keyboard navigation for large bookmark libraries
- Uses hotkeys to launch apps in the browser like Spotlight Search

Core Skills

jaygriff.com/my-stack

Languages	TypeScript, JavaScript, Python, SQL, Shell, HTML, CSS
Frameworks	Next.js, React
